## OPERATING TABLE HIRE FROM MELYD SURGICAL

Melyd Surgical (formerly known as Melyd Medical) have been the sole partners of Schaerer Medical for over 20 years, over this time we have installed over 400 Schaerer operating tables into UK hospitals.

We have been asked to hire out tables many times for many reasons and many specialities. We have now decided to officially launch our table hire division.

When is a hire required?

- For cover while your existing table is being repaired to save cancellation of lists
- When extra capacity is required such as a clash of surgery
- For speciality use such as when procedures are rarely performed

What types of tables can be hired?

- Trauma tables
- Carbon fibre top tables
- Neuro tables with scull clamp
- Spine tables
- Heavy weight tables

What is the cost?

- This will depend on the table and also if an onsite representative is required

## Table specifications and applications

- Trauma tables – Schaerer Axis/Arcus with MTS attachments

The MTS has been designed to be user friendly, with carbon fibre components and a simple set-up procedure, along with intuitive user manual. As Trauma tables involve a learning curve it is envisaged that onsite attendance would be required

- Carbon fibre top tables – Axis/Arcus

1400mm of carbon fibre allowing 360 degree imaging of any part of the body  
Ideal for: Pelvic, PCNL, Vascular, Cardiac, Orthopaedic

- Neuro Tables – Schaerer Axis/Arcus with scull clamp

- Spine Tables – Schaerer Axis/Arcus with CSF

The CSF is a four post carbon spine system with adjustable head module  
Single column design for superior Anaesthetist access  
Ideal for all types of spine surgery with 360 degree imaging capabilities

- Heavy patient weight capacity tables – Arcus

With a patient weight capacity of 450 Kg and width extenders for a wider surface

The service we are offering is as and when requirement. It is not envisaged that a potential customer would have a need at the time of reading this literature.

If this service is of interest we ask that you keep the literature on file.
